EDUCATION

B.S. Computer Science

California State University, Long Beach

Graduated December 2025

GPA: 3.66

SKILLS

Languages

JavaScript, TypeScript, Python, Java, SQL

Frameworks

React, Next.js, Node.js, Express.js, Tailwind CSS

Databases

Firebase Firestore, MySQL, MongoDB

Tools & Cloud

Git, GitHub, Google Cloud Platform, REST APIs

APIs

Anthropic Claude, OpenAI, Spotify Web, Google Maps

Full-stack developer building AI-powered applications across React, Next.js, and modern APIs

PROFESSIONAL EXPERIENCE

Fulfillment Expert

Target — Cerritos, CA Aug 2021 – Present

- Met daily fulfillment deadlines in a high-volume store by accurately processing online orders, tracking inventory, restocking shelves, and coordinating shipping handoffs with team members

TECHNICAL PROJECTS

Animals10 Image Classifier (VGG16)

Python, PyTorch, Google Colab — CECS 456 Final Dec 2025

- Hit 85% test accuracy on a 10-class animal image dataset by building VGG16 from scratch in PyTorch with batch normalization, dropout, and cosine annealing LR scheduling over 15 epochs — outperforming a ResNet50 baseline that overfit

Modo Matcha — Live Event Ordering App

TypeScript, Firebase Studio, Firestore Jul 2025 – Aug 2025

- Shipped a TypeScript drink-ordering app handling 200+ guests with zero fulfillment errors by scoping features, directing Firebase Studio to generate the build, and validating real-time order sync across customer and kitchen screens before going live

PennySprout — AI Personal Finance Analyzer

Next.js, React, Anthropic Claude API, Clerk, Recharts Jun 2025 – Sep 2025

- Built a full-stack web app turning bank-statement CSVs into spending insights by parsing uploads, sending transactions to the Claude API, and rendering category breakdowns and a 1–10 health score with Recharts
- Shipped end-to-end flows from auth to data management by integrating Clerk and building REST endpoints for upload, analysis, and per-user file CRUD

Cafinity — Full-Stack Cafe Discovery Platform

React, Firebase, Google Maps API, OpenAI API Aug 2024 – May 2025

- Cut manual review ~70% across 200+ cafe listings by building an OpenAI moderation pipeline that auto-flagged user submissions
- Enabled location search via Google Maps clustering with Haversine distance filtering

LEADERSHIP & ACTIVITIES

Web Developer

CSULB Esports Association Sep 2023 – Jul 2024

- Cut tournament site query response time ~60% and reduced manual registration processing ~75% per season by refactoring PHP/MySQL queries with database indexes and building a self-serve signup system that handled 200+ users with automated roster validation

Secretary

Women in Computing, CSULB Aug 2023 – Apr 2024

- Grew workshop attendance ~45% over the year by running a monthly MailChimp newsletter to 150+ members with event spotlights and recap content
