EDUCATION

California State University, Long Beach Long Beach, CA
Bachelor of Science in Computer Science (GPA 3.66/4.00) Graduated December 2025
Relevant Coursework:
Machine Learning, Distributed Computing, Algorithms, Database Systems, Operating Systems, Computer Security

TECHNICAL PROJECTS

PennySprout |GitHub|pennysprout.online **June 2025 – Present**

Next.js, React, TypeScript, Anthropic Claude API, Supabase (PostgreSQL), Stripe, Plaid, Clerk, Recharts, Tailwind CSS

- Developed a finance app where Claude reads PDF bank statements (no OCR) and CSV uploads to produce a health score and cash-flow charts, with Plaid bank linking including the OAuth redirect banks require in production
- Designed layered security for financial data: Row Level Security on every Postgres table (no anon-key access), a server-only key tied to the signed-in user, and personal details stripped before storage
- Implemented Stripe subscriptions, cached each month's analysis so a statement never hits the AI twice, and diagnosed and fixed a bug where an undocumented API row limit cut off results

Matcha Order Kiosk **July 2025 – Present**

Next.js, TypeScript, Firebase (Firestore), Supabase (Realtime), Twilio, IndexedDB (Dexie), Vercel

- Developed a real-time ordering system (guest menu, live barista queue) with Next.js and Firestore and ran it at a corporate event, where it handled 200+ orders
- Re-architected it in 2026 on Supabase Realtime with a guest kiosk, barista queue, and admin panel, migrating the 2025 event data
- Engineered the kiosk offline-first with IndexedDB so guests could keep ordering when venue Wi-Fi dropped
- Automated order-ready Twilio texts, handled phone numbers privately, and load tested before the event

Cafinity |GitHub|Live Demo **January 2025 – May 2025**

React, Vite, Firebase (Firestore, Auth, Hosting), Google Maps/Places API, Tailwind CSS

- Built a cafe discovery app with a team of five for our senior capstone (CECS 491A/B), with amenity filters, map search, and AI-moderated reviews
- Developed the notification system and the admin dashboard (added pagination to keep it responsive), and restructured reviews from one flat Firestore collection into subcollections
- Set up email verification, password reset, and role-based access with Firebase Auth, and built a multi-criteria search filter that queries Firestore directly

Hackathons:
AWS Agents for Humans 2026 (AI sales agent) | Rift Rewind 2025 (AWS Bedrock) | 2nd Place, MarinaHacks 2023

EXPERIENCE

Fulfillment Expert | Target **August 2021 – Present**

- Fulfilled same-day orders under tight time windows for 4+ years, keeping inventory accurate through busy stretches

Web Developer | CSULB Esports Association **September 2023 – July 2024**

- Developed a self-service registration page to replace manual tournament sign-up, so organizers no longer entered player info by hand, and restructured the underlying PHP/MySQL queries

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python, SQL, HTML, CSS
- **Frameworks & Libraries:** React, Next.js, Node.js, Tailwind CSS, Recharts
- **Databases & Infra:** PostgreSQL (Supabase), Firebase/Firestore, Git, Vercel, Row Level Security
- **APIs & Platforms:** Stripe, Plaid, Twilio, Claude API, OpenAI API, AWS (Bedrock, DynamoDB), Google Maps API
